

## **Abolishment of Tourist Communities**

**[P. 3]** After a proposal of the so-called bulldozer committee, founded by the high representative in BiH, the federal government adopted a decision to abolish municipal tourist communities.

The request was justified by the fact that municipal tourist communities create cumbersome administration and therefore they ordered foundation of canton tourist communities with inflow of all income from municipal tourist fees and then the canton would approve establishment of tourist communities in certain municipalities.

Although this decision has not been officially published yet, it caused avalanche of dissatisfaction, especially in municipalities of Stolac, Capljina and Neum because their representatives already doubt good intentions of the decision to centralize accommodation fees and request public exposure of proponents of such law who hide behind Bulldozer committee decisions.

The biggest dissatisfaction exists in Neum, which intended to invest some KM 150 000 in general tourist values during this tourist season.

“Will some federal or canton tourist community organize presentations at various world tourist fairs better,” an official from Neum wonders.
