

PLIP statistics for June 2002

The agencies of the Property Legislation Implementation Plan, OHR, UNHCR, OSCE, CRPC and UNMiBH, wish to announce the publication of the Property Legislation Implementation Statistics for the month of June of this year. Since the beginning of this year, the property legislation implementation ratio has increased by 13 percentage points, at an average of 2 percentage points every month.

The number of property claims solved in the Federation has risen to nearly 83,000 out of 142,000 claims, or 58 per cent of the total number of claims submitted to municipal housing offices. The number of claims resolved in the RS has risen to over 52,000 out of 109,000 claims, or 48 per cent of the total of claims submitted. In Brcko District over 4,000 claims out of 6,900 claims have been resolved, or 59 per cent of the total of claims submitted.

A decline in the property legislation implementation ratio has been noticed in particular in Velika Kladusa, Lukavac, Gornji Vakuf-Uskoplje, Bosanski/Srpski Brod and Sipovo, which is mainly the result of an increase in claims for private property, and a lower number of repossessions.

Other municipalities, such as Bratunac, Kotor Varos, Modrica, Srebrenica and Srpsko Goradze have witnessed a noticeable increase in the property legislation implementation, mainly due to adjustments in claims for destroyed property and an increase in repossessions.
