

STATISTICS

IMPLEMENTATION OF THE PROPERTY LAWS IN BOSNIA AND HERZEGOVINA

28 February 2002

EXPLANATORY NOTE

- **These statistics reflect the implementation of the property laws in Bosnia and Herzegovina since the passing of the property laws as amended in October 1999.**
- **These statistics are collected every month by staff of OSCE, UNHCR and OHR in the field on the basis of information provided to them by local authorities.**
- **The number of claims is equal to the total number of properties on which a claim was filed with the Municipal authorities.**
- **The number of decisions is the total number of decisions issued by the Municipal authorities.**
- **The number of repossessions is the total number of occupancy right holders or owners that have collected their keys from the municipal authorities.**
- **The implementation ratio is the total number of repossessions divided by the total number of claims expressed in percentage form.**
- **These statistics do not include information on decisions and repossessions on destroyed property, business premises or land.**
- **In some municipalities, the current implementation ratio is lower than the implementation ratio as at the end of 2000. This is due to the exclusion of destroyed property from the number of repossessions, but not from the number of claims.**
- **In some municipalities, the number of claims for socially owned property has increased since last month regardless of the deadline for submission of claims for socially owned property. This is due to the filing of requests for the enforcement of CRPC claims .**
