

Property Law Implementation reaches 52% in May, 2002

OHR, OSCE, UNHCR, CRPC and UNMIBH released today the PLIP statistics for May of this year and announced that the overall implementation rate of the Property Laws in BiH has reached 52%; this is an achievement but much more needs to be done to ensure that all property claims are solved.

In the Federation, the number of solved property claims now stands at 57% of the total claims received; that figure stands at 45 % in the RS and 55% in Brcko district.
